ANNUAL AUTUMN ON-PROPERTY
BULL SALE MORTLAKE

12 NOON WEDNESDAY, 2 MARCH 2022

www.temania.com.au

TE MANIA ANGUS
BREEDING BETTER BEEF

There are in excess of 5,000 carcase records from 420 Te Mania Angus sires that are recorded within Angus Breedplan.

We are in the business of genetic improvement of cattle.

Te Mania Angus On-Property Southern Autumn Bull Sale

WEDNESDAY 2 MARCH 2022, 12 NOON, MORTLAKE VIC

The bull sale will be interfaced with AuctionsPlus and will be conducted live, online in real time, with live audio. For those not able to attend the bull sale, this is an ideal way to purchase your bulls. Buyers must register within 48 hours prior to the sale in order to bid. For further information contact AuctionsPlus on 02 9262 4222

02 9262 4222

Team Te Mania Online Commercial Female Sale 1000+ Cows

FRIDAY 18 MARCH 2022, 11 AM, ON AUCTIONSPLUS

From some of the best-known commercial Angus breeders across NSW, Victoria and South Australia, featuring young heifers with latest genetics, proven mature age breeders, PTIC spring calvers and cows with autumn calves at foot. All are Te Mania Angus-blood and/or PTIC to Te Mania Angus bulls.

All cattle are independently assessed by AuctionsPlus and are held on vendor properties until sold. Interested purchasers are welcome to contact the vendors directly to arrange pre-sale inspections or further details

ENQUIRIES:

Hamish & Amanda McFarlane

www.temania.com.au

Dear Breeder,

We are delighted to welcome you to our 2022 autumn on-property bull sale.

Ours is now an industry based on data like never before; and the best data has never been more important. Which is why we have conducted our industry-leading progeny testing program across our cattle and across Team Te Mania for over 27 years. And why collecting and analysing feedback has always been such a major focus of our breeding strategy.

The Te Mania Angus breeding program, complemented by Team Te Mania, a coalition of more than 40 commercial herds across South Australia, Victoria, NSW and Queensland, provides vital data for not just Te Mania Angus but for the industry as a whole.

We are carrying out dedicated on-property projects including a net feed intake study, heifer fertility research and a program to better manage our methane output.

Just as we have pioneered, or embraced, industry initiatives, including online selling for the past three decades with AuctionsPlus as a cornerstone of our bull sales. This platform has developed into an option buyers now use with confidence, basing decisions on bloodlines, balanced traits and, most recently, genomic testing.

And not just for bull sales. AuctionsPlus is also host of the annual Team Te Mania Online Commercial Female Sale, which this year will be held on the new date of Friday, March 18 from 11am, offering more

than 1000 quality Te Mania Angus blood females; giving buyers a fast-track opportunity to boost the genetic profile of their own herds.

There was also very competitive digital demand for Te Mania Angus blood females on AuctionsPlus throughout 2021, helping to set up premium herds.

For example, the dispersal of the South Callandoon Pastoral herd at Goondiwindi in July, saw 169 Te Mania bloodline 2yo heifers go under the virtual hammer for an average of \$3563. Tonga Station, Mansfield, sold 240 cows (up to six and seven years old) and calves to a top \$5220.

All the research and data accumulated by Te Mania Angus is available to any interested breeder and we are always happy to share all the work we have done – your access to over 50 years of objectively focused breeding is just a phone call away.

If E does equal tm^2 , then surely E must stand for Expectations, Eating Quality, Evolution, Excellence and Environment.

Which Explains why 147 of the 176 bulls in our catalogue are in the top 30 per cent of the breed for IMF% (marbling).

And why 134 bulls will be found in the top 30 per cent for the Angus Breeding \$Index, another 134 in the top 30 per cent for the Heavy Grain \$Index and 135 also in the

top 30 per cent; this time for the Heavy Grassfed \$Index.

The marbling average of the whole catalogue is an exceptional +3.1 – compared to the breed average of just +2.1. Plenty of other trait comparisons are equally impressive.

Sires of the 2022 sale team include the outstanding Te Mania Nemo VTMM1181, with 46 sons.

Nemo is a high growth-rate sire, with good fertility and high \$Index values; and has been heavily progeny tested through Team Te Mania.

As has the renowned Te Mania Magnate VTMM13 – who in our 2021 northern bull sale had sons sell to a high of \$30,000.

And Te Mania Nolan VTMM N1423 has 20 sons in the sale. This impressive sire has been used heavily through both the Te Mania Angus and Team Te Mania herds and is an Excellent choice for use over heifers.

On behalf of the Te Mania Angus family; we look forward to seeing you at our on-property bull sale day on Wednesday March 2.

Kind regards,

Tom, Lucy, Hamish and Amanda

Te Mania cattle are renowned for quiet temperament and temperament EBVs are included in this catalogue.

176 BULLS

SOUTHERN AUTUMN BULL SALE
WEDNESDAY, 2 MARCH 2022 12 NOON
ON-PROPERTY MORTLAKE

THE TE MANIA ANGUS GUARANTEE

Any Te Mania Angus bull that proves to be structurally unsound, infertile or incapable of service is guaranteed for up to three years from date of sale.

Under these circumstances Te Mania Angus will:

- 1) Replace the bull with a satisfactory substitute if available, or
- 2) Issue a refund equal to the value remaining *see below, less the salvage value.

*The guarantee covers the purchase value of the bull, without interest, cost and damages. The guarantee shall apply providing the bull's incapacity is not caused by injury or disease contracted since leaving Te Mania Angus, the value remaining is calculated on the basis the guarantee is reduced by one third of the purchase price for each year of service from the sale date. A veterinary certificate must be supplied by the purchaser on request.

If any bull purchased does not possess a reasonable fertility, although not totally infertile, any dispute arising shall be settled by an arbitrator appointed by the auctioneers and must be lodged within 12 calendar months from date of sale.

We recommend all purchasers discuss injury insurance of their bulls at the sale with Elders Ltd or their Agent. This guarantee is in addition to the normal terms and conditions governing auction sales.

HEALTH TREATMENTS

All the sale bulls are vaccinated for Vibriosis, have been ear notched and screened for Pestivirus (BVDV) unless found to have a high immunity making vaccination unnecessary. We recommend you consult your vet regarding ongoing BVDV prevention in your herd.

All bulls received 7:1 vaccinations at three-months, six weeks later and a booster as a yearling. They are drenched at weaning and periodically when required.

All Te Mania Angus bulls are vet examined before sale day, including palpation of the sexual anatomy and testicle circumference of the testicles. The jaw is checked for correct bite.

Johnes Disease: Te Mania Angus is J-BAS 6 accredited. J-BAS focuses on managing on-farm biosecurity risk rather than controlling disease through regulation and treats JD as just one of many diseases producers must manage within their business.

GENETIC DISORDERS

ALL BULLS ARE TESTED FREE AND/OR PEDIGREE FREE OF:

Arthrogryposis Multiplex (AM), Neuropathic Hydrocephalus (NH) and Contractural Arachnodactyly (CA), formerly known as Fawn Calf Syndrome and Developmental Duplications (DD) recessive gene, please refer to each lot for notification.

For more information on AM, NH, CA and DD go to temania.com.au

FREIGHT ASSISTANCE

Conditions apply, see page 3 for details.

CATERING

Breakfast, morning tea and lunch will be provided at the sale. Please join us post sale for refreshments.

PRE SALE INSPECTION

Bulls will be yarded by 7.30 am on sale day. Inspections are welcome any other time by arrangement.

REBATES

All purchasers will be asked to nominate a settling agent and a 3% rebate will be paid to all settling agents who settle within 7 days of the invoice being received.

GST

Bulls will be sold GST exclusive i.e. if the bull is knocked down for \$7000, you will be charged \$7700.

AUCTIONSPLUS

The sale is interfaced with AuctionsPlus and will be conducted online in real time. If you cannot attend the sale you must register 24 hours before the sale to bid.

For further information contact: 02 9262 4222 or info@auctionsplus.com.au or Elders Camperdown on 03 5593 1822

SELLING AGENTS

Ross Milne: 0408 057 558

Clarke Roycroft: 0409 677 281

Elders Camperdown: 03 5593 1822

Auctioneer: Brian Leslie

DIRECTIONS

From Mortlake (10km): Take the Hopkins Highway (B120) heading south towards Warrnambool, for 4.8km. Turn right into Reichmans Lane and travel for another 4.8km. Entrance on the right hand side is clearly marked with a Te Mania Angus sign.

From Warrnambool (42km): Take the Hopkins Highway (B120) heading north to Mortlake for 37.5km. Turn left onto Delaney's Lane and travel 3.6km. Then you have arrived.

By Air: Avalon Airport (Geelong) is the closest commercial airport, with regular flights through Jetstar. Avalon Airport is two hours 15 minutes from Mortlake.

Charter flights are available to Warrnambool through Sharp Airlines on 1300 55 66 94. Please contact Te Mania Angus to arrange collection.

ACCOMMODATION

Mortlake (10km from Te Mania Angus)

- Mac's Hotel, 90 Dunlop Street 03 5599 2007
- The Stables Motel, Mt Shadwell Hotel, 128 Dunlop Street 03 5599 2019

HOW SALE DAY WORKS

All the sale bulls will be penned and available for viewing from 7.30 am on sale day.

The bulls will be sold by open-cry auction, with video footage displayed on large, closed-circuit screens inside the woolshed.

Buyers have the option of bidding from the woolshed, from the bullpens or at other venues through AuctionsPlus.

This system was introduced at the 2010 autumn on property Bull Sale and has received positive feedback from both purchasers and their agents.

JOIN US FOR BREAKFAST

We would like you to join us for breakfast on sale morning from 7 am. Delicious bacon and eggs will be cooked by Fiona Glover and her crew from Australian Bovine Conceptions for all to enjoy.

PHYSICAL OWNERSHIP AND SEMEN INTERESTS

TERMS AND CONDITIONS OF SALE

Bulls auctioned by Te Mania Angus are sold strictly on the following terms and conditions:

The bull is the physical property of the buyer/s.

Semen from the bull must only be collected and used within the herds nominated (to a maximum of four herds) on the Buyer Registration form prior to the sale.

Semen from the bull cannot be sold, transferred or provided to any third-party without the prior consent of Te Mania Angus.

The purchase of the bull gives the buyer/s a licence to use the Te Mania Angus name and associated intellectual property to advertise progeny associated with insemination from the bull within the buyer's herd (licence).

If the buyer/s breaches any of these terms and conditions of sale, Te Mania Angus may revoke the licence immediately. Insemination of an animal of a herd not nominated on the Buyer Registration form is a breach of the licence.

Te Mania Angus retains the exclusive right to collect semen from the bull at a future date for the purpose of semen production

and cloning. Semen will be collected at Te Mania Angus' expense and Te Mania Angus will arrange an appropriate time and place for collection that will not unreasonably interfere with the use of the bull by the buyer/s.

If the bull is re-sold by the buyer/s at a later date, these terms and conditions will apply to that purchaser or any person in possession of the bull and Te Mania Angus retains exclusive rights to continue to collect semen from the bull. The buyer can only transfer the bull if that subsequent purchaser accepts these conditions.

BULL SALE FREIGHT ASSISTANCE

TE MANIA ANGUS WILL PROVIDE PURCHASERS FROM:

VICTORIA

A freight free service to Sale and Mansfield. Beyond these destinations will be the purchaser's responsibility.

SA, WA & NT

There is a free service to Lucindale, SA, via major towns on a direct route. All onward freight arrangements for state and interstate destinations from those mentioned above will be the responsibility of the purchaser.

NSW & QUEENSLAND

A freight free service to Roma, Queensland, going through Walgett and Dubbo. Onward freight arrangements from Dubbo or intermediate points will be the purchaser's responsibility.

TASMANIA, KING & FLINDERS ISLANDS

Freight assistance of \$200 per bull purchased.

CONDITIONS

To make use of this offer and service, it is essential purchasers notify Te Mania Angus before making any other freight arrangements.

This service cannot be made available to purchasers who have already contracted for freight before talking to Te Mania Angus. All other destinations are arranged at low cost to the purchaser.

CARRIERS

Dick Smith Transport of Dubbo have been invited to the sale to coordinate the delivery of stock. They can be contacted on the details listed below

All Te Mania bulls are independently assessed for structural soundness and temperament.

STRUCTURAL SCORES & STRUCTURAL ESTIMATED BREEDING VALUES

Structural assessments are a vital part of the breeding program at Te Mania Angus – with every bull independently assessed as a yearling and every female assessed annually for the first three years of her breeding life and periodically after that for research purposes.

Good cattle structure has a direct impact on producer profitability. Objectively measuring structure, in conjunction with the use of performance recording (EBVs) gives us a greater picture of how that animal will perform. It gives us insight into the key profit drivers that affect the bottom line for commercial cattle breeders.

Issues with structure can affect bull and cow longevity. The Beef Class Structural Assessment System measures claw set, front and rear foot angle, rear legs, and for females – teats and udders as well.

Leg and feet structure in particular are highly heritable, therefore identifying structural issues within your animals allows you to improve your herd through assessment and selection.

Te Mania Angus collects information based on unbiased, factual data, and relates it back to the animal and its genetics. This gives us information about which pedigrees have desirable structure.

Jim Green has been assessing Te Mania Angus cattle since 1994. In those 25 years there has been an intensive structural assessment program running at Te Mania Angus which enables us to make very accurate predictions about how certain combinations of genetics will perform structurally.

The cattle are assessed in line with the Beef Class Structural Assessment System for leg and foot structure. Currently, the annual structural assessment program at Te Mania Angus is as follows:

December: Every yearling bull is assessed. Management groups are observed as in all performance recording, and this data is submitted to Breedplan and genetically analysed, with structure EBVs calculated. This data is presented in the Te Mania Angus bull sale catalogues.

January/ February: At weaning all first-, second- and third-calving cows are assessed for structure including teat size and shape, udder attachment and udder evenness.

May: All bulls in the spring bull sale team are reassessed so they all have current assessments.

July: All maiden heifers are assessed before calving so the next joining decisions

can be made. This data is also genetically analysed using Angus Group Breedplan.

Any animal at any assessment which scores outside the acceptable range is culled – regardless of figures and no questions asked.

The Beef Class Structural Assessment System was designed by the MLA, the BIA and several breed societies to address structural problems in the beef industry.

STRUCTURAL SOUNDNESS EBV'S:

All of the structural scores are used to calculate Structural Soundness EBV's with Angus Breedplan. Both the Beef Class Structural Assessment Score and the EBV are shown in the bull sale catalogue.

The value of EBVs over raw data is they are the fast track to improving the genetic profile and bottom-line performance of any herd. EBVs give a benchmarked breeding predictability (genotype), while raw data is a snap shot of how the animal presents (phenotype).

Selecting animals with superior structural soundness EBVs is paramount to genetically improving structural traits in a cattle breeding enterprise.

As with selection for any trait, genetic improvement for structural soundness will be achieved if the breeding animals are genetically superior to those used in previous years.

This is absolutely essential when selecting sires due to the overall influence of their genetics in a herd in the short and long term.

1-9 SCORING SYSTEM FOR FEET AND LEG STRUCTURE

- A score of 5 is ideal
- A score of 4 or 6 shows slight variation from ideal, but this includes most sound animals.
- An animal scoring 4 or 6 would be acceptable in any breeding program;
- A score of 3 or 7 shows greater variation but would be acceptable in most commercial programs. However, seedstock producers should be vigilant and understand that this score indicates greater variation from ideal;
- A score of 2 or 8 are low scoring animals and should be looked at cautiously and inspected very closely before purchasing;
- A score of 1 or 9 should not be catalogued and are considered immediate culls.

Structural scores assessed by Jim Green are published in Te Mania Angus catalogues for all sale bulls, as well as the Structural Soundness EBV.

Jim Green
Green's Livestock Services
Ph 0402 003 137

Every bull in this catalogue has been verified for parentage.

Every EBV that is currently available from Breedplan is recorded at Te Mania Angus and included in this catalogue.

Your new bull, his past & future.

Our calves are weaned at five months after early weaning was introduced to enhance rumen function and allow the females a better run through autumn and winter.

At Te Mania Angus all calves are weighed and tagged (NLIS and stud) the day they are born. They are weighed again at weaning and 400 days, when they are ultrasound scanned for marbling, fat cover and eye muscle area.

Testicle measurements are taken on the bull calves. Heifers are weighed again at 600 days and all this data is submitted to Breedplan. Cows are weighed at weaning to contribute to the Mature Cow Weight EBV.

All the cow herd mating details are in Angus Breedplan, which calculates a gestation length EBV. Short gestation length is a crucial EBV to use with Birth Weight when selecting young bulls to use over heifers.

All the bulls receive 7:1 vaccinations at three-months, six weeks later and a booster as a yearling. They are drenched at weaning and periodically throughout their lives (they also receive a drench before leaving the property).

All Te Mania Angus bulls are vet examined immediately before sale day, including palpation of the sexual anatomy and testicles.

PESTIVIRUS

All bulls have been ear notched and screened for BVDV (also known as Pestivirus) and found to have a high immunity making vaccination unnecessary.

We recommend that you consult your own vet regarding an ongoing BVDV programme for your herd.

STRUCTURE

Independent structural assessments are done by Jim Green, of Green's Livestock Services, to ensure any bull not meeting

our uncompromising standards is culled. Structural scores and EBVs are provided for each bull throughout the catalogue. See *previous page*.

VACCINATIONS

7:1 Vaccination: We recommend bulls get a 7:1 annually, 2-4 weeks before joining.

Vibriosis vaccination: Vibriosis is a common cause of infertility and is transmitted by bulls from one female to another. It is easily prevented by vaccination. Te Mania Angus bulls are given a primer and booster vaccination. We recommend all your bulls get one shot before joining each year. A bull contracting Vibriosis while out with cows will become infertile.

BULL MANAGEMENT

When a bull leaves Te Mania Angus, he is leaving the security of a large mob and will arrive at unfamiliar territory. If you can't put him into the bull mob straight away, unload him and make sure he has a steer or cow as a companion.

A young bull can move in with older bulls and settle in well, but remember, being the youngest he will get the last of the feed available because of the pecking order. The paddock needs to be reasonably large so he can keep away from the others and find adequate feed and water.

Young bulls are still growing fast and need enough feed to maintain their growth pattern and to be able to settle the cows quickly and efficiently.

Te Mania Angus bulls are accustomed to being handled by stockmen on motorbikes, horses and with dogs. Most of the fences are electrified and the bulls treat them with respect. Always be considerate to your bull and handle him with respect and kindness. You will find you will receive these acts of respect back from him.

BULL/COW RATIO

Under reasonable paddock conditions, a rising two-year-old bull should handle 40 empty cows on his own. An older bull can probably handle slightly more.

A synchronized AI program can decrease the number of bulls needed, because cows become pregnant to AI, but be aware that if the cows are returning over one week rather than three, then this will increase your bull requirement. Please contact Te Mania Angus for further clarification if required.

BEFORE PUTTING THE BULL OUT

Before mating cows should be seen cycling in groups; with male calves also hanging around. The cows must be on a rising plane of nutrition, before you put the bull out, to ensure the optimum chance of cycling.

OBSERVING THE BULL

A bull is most likely to develop a condition or injury that causes infertility AFTER THE JOINING PERIOD HAS STARTED. It is vital you monitor your bull at least twice weekly to ensure he is able to mount cows, looks physically normal and is not lame.

Towards the end of the mating period, you should spend some time watching the cows to make sure that large numbers of cows are not cycling. Set aside half an hour one afternoon when the cows are at rest to make sure that most of the cycling activity has stopped, and give yourself some peace of mind! Writing down the cow's number at service and observing them 21 days later is the most thorough infertility check.

AFTER MATING SEASON

When the season is finished, the bull should be drenched and put away on good feed. Adequate feed will help stop fighting and help the bulls settle into their groups.

UNDERSTANDING THE TRANSTASMAN ANGUS CATTLE EVALUATION (TACE)

WHAT IS THE TRANSTASMAN ANGUS CATTLE EVALUATION?

The TransTasman Angus Cattle Evaluation is the genetic evaluation program adopted by Angus Australia for Angus and Angus influenced beef cattle. The TransTasman Angus Cattle Evaluation uses Best Linear Unbiased Prediction (BLUP) technology to produce Estimated Breeding Values (EBVs) of recorded cattle for a range of important production traits (e.g. weight, carcass, fertility).

The TransTasman Angus Cattle Evaluation is an international genetic evaluation and includes pedigree, performance and genomic information from the Angus Australia and Angus New Zealand databases, along with selected information from the American and Canadian Angus Associations.

The TransTasman Angus Cattle Evaluation utilises a range of genetic evaluation software, including the internationally recognised BLUPF90 family of programs, and BREEDPLAN beef genetic evaluation analytical software, as developed by the Animal Genetics and Breeding Unit (AGBU), a joint institute of NSW Agriculture and the University of New England, and Meat and Livestock Australia Limited (MLA).

WHAT IS AN EBV?

An animal's breeding value can be defined as its genetic merit for each trait. While it is not possible to determine an animal's true breeding value, it is possible to estimate it. These estimates of an animal's true breeding value are called EBVs (Estimated Breeding Values).

EBVs are expressed as the difference between an individual animal's genetics and a historical genetic level (i.e. group of animals) within the TACE genetic evaluation, and are reported in the units in which the measurements are taken.

USING EBVS TO COMPARE THE GENETICS OF TWO ANIMALS

TACE EBVs can be used to estimate the expected difference in the genetics of two animals, with the expected difference equating to half the difference in the EBVs of the animals, all other things being equal (e.g. they are joined to the same animal/s).

For example, a bull with a 200 Day Growth EBV of +60 would be expected to produce progeny that are, on average, 10 kg heavier at 200 days of age than a bull with a 200 Day Growth EBV of +40 kg (i.e. 20 kg difference between the sire's EBVs, then halved as the sire only contributes half the genetics).

Or similarly, a bull with an IMF EBV of +3.0 would be expected to produce progeny with on average, 1% more intramuscular fat in a 400 kg carcass than a bull with a IMF EBV of +1.0 (i.e. 2% difference between the sire's EBVs, then halved as the sire only contributes half the genetics).

USING EBVS TO BENCHMARK AN ANIMAL'S GENETICS WITH THE BREED

EBVs can also be used to benchmark an animal's genetics relative to the genetics of other Angus or Angus infused animals recorded with Angus Australia.

To benchmark an animal's genetics relative to other Angus animals, an animal's EBV

can be compared to the EBV reference tables, which provide:

- the breed average EBV
- the percentile bands table

The current breed average EBV is listed on the bottom of each page in this publication, while the current EBV reference tables are included at the end of these introductory notes.

For easy reference, the percentile band in which an animal's EBV ranks is also published in association with the EBV.

CONSIDERING ACCURACY

An accuracy value is published with each EBV, and is usually displayed as a percentage value immediately below the EBV.

The accuracy value provides an indication of the reliability of the EBV in estimating the animal's genetics (or true breeding value), and is an indication of the amount of information that has been used in the calculation of the EBV.

EBVs with accuracy values below 50% should be considered as preliminary or of low accuracy, 50-74% as of medium accuracy, 75-90% of medium to high accuracy, and 90% or greater as high accuracy.

DESCRIPTION OF TACE EBVS

EBVs are calculated for a range of traits within TACE, covering calving ease, growth, fertility, maternal performance, carcass merit, feed efficiency and structural soundness. A description of each EBV included in this publication is provided on the following page.

Every Te Mania Angus female for the first three years of her breeding life is independently assessed for structural soundness annually.

CalvingEase	CEDir	%	Genetic differences in the ability of a sire's calves to be born unassisted from 2 year old heifers.	Higher EBVs indicate fewer calving difficulties in 2 year old heifers.
	CEDtrs	%	Genetic differences in the ability of a sire's daughters to calve unassisted at 2 years of age.	Higher EBVs indicate fewer calving difficulties in 2 year old heifers.
	GL	days	Genetic differences between animals in the length of time from the date of conception to the birth of the calf.	Lower EBVs indicate shorter gestation length.
	BW	kg	Genetic differences between animals in calf weight at birth.	Lower EBVs indicate lighter birth weight.
Growth	200 Day	kg	Genetic differences between animals in live weight at 200 days of age due to genetics for growth.	Higher EBVs indicate heavier live weight.
	400 Day	kg	Genetic differences between animals in live weight at 400 days of age.	Higher EBVs indicate heavier live weight.
	600 Day	kg	Genetic differences between animals in live weight at 600 days of age.	Higher EBVs indicate heavier live weight.
	MCW	kg	Genetic differences between animals in live weight of cows at 5 years of age.	Higher EBVs indicate heavier mature weight.
	Milk	kg	Genetic differences between animals in live weight at 200 days of age due to the maternal contribution of its dam.	Higher EBVs indicate heavier live weight.
Fertility	DtC	days	Genetic differences between animals in the time from the start of the joining period (i.e. when the female is introduced to a bull) until subsequent calving.	Lower EBVs indicate shorter time to calving.
	SS	cm	Genetic differences between animals in scrotal circumference at 400 days of age.	Higher EBVs indicate larger scrotal circumference.
Carcase	CWT	kg	Genetic differences between animals in hot standard carcase weight at 750 days of age.	Higher EBVs indicate heavier carcase weight.
	EMA	cm ²	Genetic differences between animals in eye muscle area at the 12/13th rib site in a 400 kg carcase.	Higher EBVs indicate larger eye muscle area.
	Rib Fat	mm	Genetic differences between animals in fat depth at the 12/13th rib site in a 400 kg carcase.	Higher EBVs indicate more fat.
	P8Fat	mm	Genetic differences between animals in fat depth at the P8 rump site in a 400 kg carcase.	Higher EBVs indicate more fat.
	RBV	%	Genetic differences between animals in boned out saleable meat from a 400 kg carcase.	Higher EBVs indicate higher yield.
	IMF	%	Genetic differences between animals in intramuscular fat (marbling) at the 12/13th rib site in a 400 kg carcase.	Higher EBVs indicate more intramuscular fat.
Feed/Temp.	NFI-F	kg/day	Genetic differences between animals in feed intake at a standard weight and rate of weight gain when animals are in a feedlot finishing phase.	Lower EBVs indicate more feed efficiency.
	Doc	%	Genetic differences between animals in temperament.	Higher EBVs indicate better temperament.
Structure	Foot Angle	score	Genetic differences in foot angle (strength of pastern, depth of heel).	Lower EBVs indicate more desirable foot angle.
	Claw Set	score	Genetic differences in claw set structure (shape and evenness of claws).	Lower EBVs indicate more desirable claw structure.
SelectionIndexes	\$A	\$	Genetic differences between animals in net profitability per cow joined in a typical commercial self replacing herd using Angus bulls. This selection index is not specific to a particular market end-point, but identifies animals that will improve overall net profitability in the majority of commercial, self replacing, grass and grain finishing beef production systems.	Higher selection indexes indicate greater profitability.
	\$D	\$	Genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting the domestic supermarket trade. Steers are either finished using pasture, pasture supplemented by grain, or grain (e.g. 50 -70 days) with steers assumed to be slaughtered at 510kg live weight (280kg carcase weight with 12mm P8 fat depth) at 16 months of age.	Higher selection indexes indicate greater profitability.
	\$GN	\$	Genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting pasture grown steers with a 250 day feedlot finishing period for the grain fed high quality, highly marbled markets. Steers are assumed to be slaughtered at 800 kg live weight (455 kg carcase weight with 30 mm P8 fat depth) at 24 months of age, with a significant premium for steers that exhibit superior marbling.	Higher selection indexes indicate greater profitability.
	\$GS	\$	Genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting pasture finished steers. Steers are assumed to be slaughtered at 650 kg live weight (350 kg carcase weight with 12 mm P8 fat depth) at 22 months of age. Emphasis has been placed on eating quality and tenderness to favour animals that are suited to MSA requirements.	Higher selection indexes indicate greater profitability.

The percentile bands represent the distribution of EBVs across the 2020 drop Australian Angus and Angus-influenced seedstock animals analysed in the January 2022 TransTasman Angus Cattle Evaluation.

JANUARY 2022 REFERENCE TABLES

At weaning every calf has a tissue sample taken for genomic testing and parent verification.

Jim Green is an independent livestock assessor and has been scanning and assessing our cattle for 30+ years.

BREED AVERAGE EBVS

A full suite of Te Mania blood for the past three generations on both sides of this bulls pedigree. This naturally conceived son of Learmonth presents with good frame, length and thickness and is well suited for use over heifers. Maternal longevity on the dams side, where as a rising ten year old female, she remains active within our stud herd.

Added softness and shape on display in this ET conceived son of Jolson. The dam of this bull has run through our donor program in 2015, 2017 and 2019 and from who we have 56 progeny recorded, she remained active within our stud herd until nine years of age and sold on for future breeding. Nolan has been used heavily through both our stud herd and Team Te Mania herds and is well suited for use over heifers.

Stylish and balanced with good body length and butt shape on display. Sons of Jenkins have been sought after through our past five bull sales where we have sold 47 sons to a high of \$42,000 and for an average of \$10,638. This ET conceived son of Jenkins is an outcross and suitable to go over daughters of Berkley, Garth and Regent. This promising sire has been entered in cohort 10 of Angus Sire Benchmarking Program and we have also sold semen to the United Kingdom and Europe.

Stylish with shape and natural thickness on display in this AI conceived first calf out of a two year old heifer. Strong maternal breeding on the dams side of this sires pedigree and from our Lowan cow family which is the most prominent in our herd. This promising sire has been entered in cohort 10 of Angus Sire Benchmarking Program.

Sire pictured

Since birth year 2010 there have been 175 Te Mania Angus sires with 14,390 progeny that have had docility records recorded within Angus Breedplan.

Te Mania Monarch is a very high marbling bull with excellent calving ease. We have used this sire over both heifers and cows and he has been progeny tested through Team Te Mania. His sons present with good overall shape and body length.

Te Mania Angus heifers are monitored for fertility using Allflex Heatime collars to record maturity, fertility, health and wellbeing. The data collected will be analysed and contributed towards fertility EBVs.

This Rennylea bull has a very desirable combination of retail beef yield and marbling. He is in the top 1% of the breed for marbling, with high values for the Heavy Grain and the Angus Breeding \$Index.

All Te Mania Angus cattle have Single Step genomic information included in the calculation of their Breedplan EBVs. The combination of Single Step and progeny testing gives breeders more confidence in identifying animals with genetics suited to their production goals.

Envision is an easy doing calving ease bull.

NFI has a high correlation to methane output, the more efficient animals are, the less methane they produce. This lowers greenhouse gas emissions from the beef industry. NFI testing at Te Mania Angus is to ensure that we are addressing consumer concerns.

Te Mania Ned is a high marbling, high \$Indexing bull with a renowned pedigree.

Te Mania Angus bulls will be tested for Net Feed Intake (NFI) to record feed consumption against weight gain, to identify the most efficient bloodlines.
